Partner To
Hospitals &
Community
Health Centres

Committed To
Quality, Reliability, and
Service Excellence

With a legacy spanning over a decade, our journey began with a humble vision that has since burgeoned into a cornerstone of trust in the medical supply landscape.

As a steadfast ally to healthcare providers, we've evolved into a revered entity catering to a spectrum of needs. Kastipharm has a rich history of serving various areas within the healthcare industry.

The foundation of our success lies in the trust bestowed upon us by healthcare providers across the region. We have established ourselves as a pivotal partner to numerous healthcare facilities, from the largest national hospitals like Muhimbili National Hospital to community health centres and dispensaries across the country. Their reliance on our expertise is a testament to our unwavering commitment to quality, reliability, and service excellence.

This trust has allowed us to expand our reach and deepen our impact, enabling us to stand shoulder to shoulder with healthcare professionals in their pursuit of providing optimal care. Our expertise spans across various critical areas:

	Pharmaceuticals Importation & Distribution		Laboratory & Diagnostic Equipments + Supplies
	Hospital Furnitures		Healthcare ICT Solutions

Kastipharm played an integral role in the nationwide Laboratory Standardisation Project, a government initiative to standardise laboratory equipment across all health facilities.

This undertaking aimed to ensure optimal uptime of crucial laboratory equipment in health facilities across Tanzania, a testament to our commitment to advancing healthcare services nationwide. Through our involvement in this ground breaking initiative we have strengthened our collaboration with the government in the quest to improve the provision healthcare in Tanzania.

The objective of maintaining 95-100% uptime for these machines was to ensure their constant availability for diagnostics. This availability translates to prompt and accurate patient treatment. To achieve this our company was awarded a nationwide contract to supply, install, commission, train operators, and provide ongoing support and maintenance for three key laboratory technologies out of the eleven technologies that were standardised. These include:

Semi-Automated Chemistry Analyser	3-Part Differential Haematology Analyser	Urine Chemistry Analyser
-----------------------------------	--	--------------------------

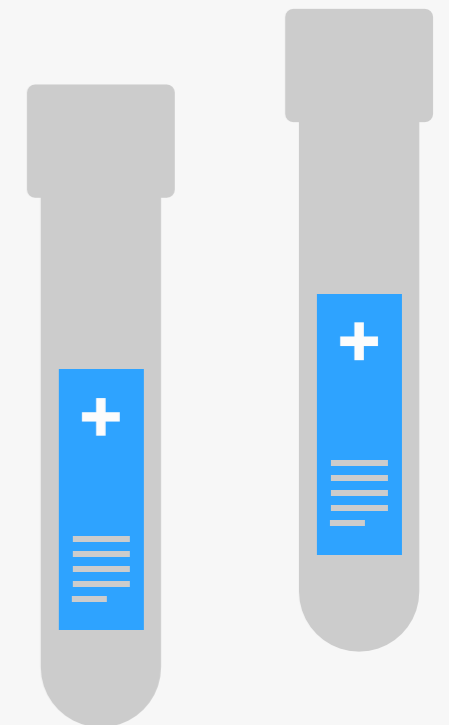

Fully Automated Chemistry Analyser	Glycosylated HB Reader Machine
5-Part Differential Haematology Analyser	Haemoglobin Machine
Immunology Analyser	Electrolyte Machine
Coagulation Analyser	Glucose Machine
